

## Grandma's House

### COVID-19: Transportation Policy Amendment

We have adopted additional health and safety protocols to prevent the spread of COVID-19 while transporting children to/from local schools on Grandma's House buses:

- Bus Driver will wear a face covering.
- Bus Driver and children should wash hands at the center before lining up to go on the bus.
- Bus Driver will check children's temperatures with no-touch thermometer before they get on the bus to go to school.
- Children will have assigned seats on the bus. Children should sit in separate seats, if possible. Siblings may share a seat if necessary.
- Bus driver will open windows when possible to increase ventilation. Do not use the recirculated air option for ventilation.
- Bus Driver should thoroughly clean the bus after each bus run. Use Sani Spritz and rag to wipe down all seats (front and back), seat belts, handrails, vandal lock, alarm button, door handles, driver controls, steering wheel.
